

# Personal Blog Website

A Personal Blog Website with two roles:

1. Admin
  2. User
- 

Admin Capabilities:

1. Blog Management:
    - Admin can create, edit, and delete blog posts.
  2. Comment Management:
    - Admin can delete user comments and manage them.
  3. User Management:
    - Admin can manage logged-in users, send messages to them, and delete any user.
- 

User Capabilities:

1. Public Access Features: (No login required):
    - Read blog posts.
    - Search blogs.
    - Filter blogs by category.
  2. Logged-in User Features:
    - Like and comment on blog posts.
    - Update their name, profile picture, password, and email from their personal dashboard.
- 

Suggestions for Additional Features:

1. Admin Side:
  - Analytics Dashboard: View blog performance and user engagement statistics.
  - Scheduled Posts: Allow admin to schedule blogs for future publication.
  - Notifications: Send notifications to specific or all users.
2. User Side:
  - Bookmark Blogs: Users can save their favorite blogs for later reading.

- Follow Categories or Authors: Users can follow specific categories or authors to receive updates.
- Advanced Search: Search blogs by tags, author name, or publication date.
- Report System: Allow users to report inappropriate comments or blogs.
